Hydra-Gro 30-0-0

Hydra-Gro is a scientifically formulated blend of quick release and slowly available nitrogen for foliar uptake, improving general plant health and shoot growth.

The liquid slow release nitrogen provides an even and consistent 6 to 8 week feed, avoiding issues associated with a surge of growth. Hydra-Gro is resinous and adheres to leaf surfaces and resists leaching in the soil where it is broken down by microbial activity and is slowly delivered to the plant.

Hydra-Gro nitrogen is a low salt index, urea triazone nitrogen source that provides rapid, yet sustained feeding through both root and leaf tissue. The net result is a more consistent and lasting color response without stimulating excess canopy growth and without introducing unnecessary plant stress from excess fertilizer salts.

HydraSmart

Benefits:

- High efficiency nitrogen delivery
- 60% triazone urea for uniform response
- Very low salt index
- No nitrates
- Foliar and soil applications

Product Label Information

2.5 Gallons. Weight Per Gallon: 10.40 lbs.

Guaranteed Analysis: 30-0-0

Nitrogen (N).....30.0%

12.0% Urea nitrogen

18.0% Other water soluble nitrogen*

Derived from: Urea-triazone

Application Recommendation

Hydra-Gro can be applied for both foliar and soil applications. It can be tank mixed with other fertilizers or turf chemicals after conducting a jar test for compatibility.

Foliar Cool Season Spray: 3.0 to 15.0 ounces per 1000 square feet

Foliar Warm Season Spray: 3.0 to 15.0 ounces per 1000 square feet

Ornamental: 2.0 to 4.0 quarts per 100 gallons of water and apply as a foliar spray, deep root injection or soil drench
