Hydra-IronUp5

Developed for rapid color response and / or masking pesticide sprays on turf, **Hydra-Iron Up5** is derived from iron citrate; an iron source that is complexed with an organic acid designed to enhance uptake and tank mix compatibility. It is designed to prevent and/or correct iron deficiencies in most crops, ornamentals, and turfgrass. Hydra-IronUp5 can be applied to the soil or foliage and can be applied alone or combined with other nutrients or pesticides.

Hydra-IronUp5 is designed to significantly reduce the risk of staining on concrete, siding, walkways, etc., but applicants should use extreme caution around untreated porous surfaces such as marble and wood.

HydraSmart

Benefits:

- No nitrates
- Chelated with organic acids
- Unrivaled color response
- Developed for foliar and soil applications
- No salts
- Extremely safe on plants
- Reduced risk of staining
