

# **Hydra-Last**

**Hydra-Last** is a 90 to 120 day soil surfactant, developed with a blend of three high- performance branched polymers designed for unmatched soil surfactant longevity. If a “branch” of the molecule is cleaved off by microbial activity, the branch reattaches to the soil particle and retains its hydration. Even when all branches are removed, the “branchless” parent molecule retains its hydration.

---

Perfect for fairways and areas that have limited access where turf managers would prefer to make only one or two applications a year. Delivers uniform hydration, penetration, and rewetting with extremely low risk of phytotoxicity.

**Hydra** **Smart**

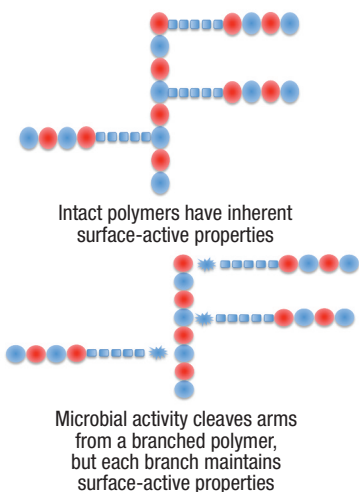

## **Benefits:**

- 100% active ingredient
- Increased vertical and lateral movement and distribution of moisture
- Moves H<sub>2</sub>O laterally where required
- Extreme low risk of phytotoxicity
- Increased hydration characteristics
- Nutrient Efficiency Polymer: water conditioner

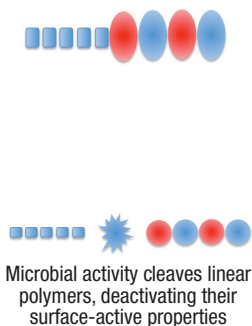

## **Competitive Solutions:**

- 1690
- PDF 150
- Hydro90
- LT120

### Hydra-Last Branched Polymer Technology

### Competitive Long-Term Polymers

## Product Label Information

2.5 Gallons. Weight Per Gallon: 8.6 lbs.

### Guaranteed Analysis:

Proprietary blend of alkoxylated polyols.....100%

## Application Recommendation

**Single application:** Apply 16.0 ounces per 1,000 square feet

**Split application:** Apply 8.0 oz. per 1000 square feet then an additional 8 oz. 14 days later
