

Hydra-Push

Hydra-Push “pushes water” quicker and more efficiently than any slightly comparable products. It is a comprehensive combination of dual-mode surfactants, proprietary sequestered agents and amino acids, plus HydraSmart’s exclusive nutrient efficiency polymer. Unique to anything else on the market, Hydra-Push penetrates water through hydrophobic soils and moves water laterally where needed, while flushing bicarbonates and sodium off of the colloid.

Hydra-Push is the only surfactant solution to aid with water management, soil management, tank mix acidifier and plant health. The combination of acid, penetrants, soil surfactants, and nutrient efficiency polymers makes Hydra Push a “**Total Soil System Surfactant**”

 HydraSmart

Benefits:

- Highest AI compared to like products on market
- Improves H₂O penetration and flushes bicarbonates
- Moves H₂O laterally where required
- Liberates Ca and Mg to assist in salinity management
- Nutrient Efficiency Polymer: phosphate catalyst
- Nutrient Efficiency Polymer: water conditioner

Product Label Information

2.5 Gallons. Weight Per Gallon: 8.6 lbs.

Guaranteed Analysis:

Alcohol Ethoxylates.....	10.0%
Ethylene Oxide/Propylene Oxide Copolymer	10.0%
Inerts and Dicarbamide Dihydrogen Sulfate	80.0%

Application Recommendation

Apply 0.5 to 2.0 ounces per 1,000 square feet every 30 days. Lightly irrigate the product into the soil profile for best results.

Apply at 1.0 oz. in combination with other surfactant chemistries to move water during heavy rain seasons or simply slightly spongy turf.
